## Periodic Table Basics

Every periodic table should have the following information on it: the atomic number, the element symbol, and the atomic mass.

1. Look at a periodic table. What do you notice about the atomic numbers as you read from left to right?
2. Atomic masses are usually written with decimals or in parentheses. What do you notice about the atomic masses as you read from left to right on the periodic table?
3. Listed below are elements you will find on the periodic table. Find them and write the missing information in the boxes.

Symbol	Element Name	Atomic Number	Atomic Mass
H			
He			
	Lithium		
	Aluminum		
		47	
		79	
		20	
Mg			
S			
	Chlorine		
	Argon
