

# Physics I - Spring Final Exam Review

## Minimum Requirements

You must answer all the multiple choice questions. You must also pick 10 problems to do on a separate sheet of paper. If you do more than 10 problems, it will be bonus (see below). This will be taken for a 15-point grade on exam day. Please note: if you show no work for any problem, the maximum score you can get on this assignment is a 7/15.

## Extra Credit

Extra credit will be applied to your exam grade. The exam is about 45 questions at 2 points per question, so each point of extra credit counts as about a 1% bump on your exam grade.

- You will get a 1 point for not skipping any problems.
- You may explain your answers for each question. For every 10 questions you explain, you get 1 point. (Do this on a separate sheet of paper)
- You may name every variable in each equation on the equation sheet and give the units for each to get an additional 1 point
- You may define all of the “important terms” for each section for 1 point. (Do this on a separate sheet of paper)
- Maximum extra credit is 10 points (upwards of a 10% bump to your exam grade)
- Any extra credit you do must be hand written. It may NOT be typed!

## The Final Exam

The final exam will consist of 40-50 multiple choice questions. (Problems will be included, but they will be answered as multiple choice).

## Online Access to the Textbook

Feel free to check out a textbook for study or access it online: Go to [www.masteringphysics.com](http://www.masteringphysics.com) and use one of the following (case sensitive) username/password combinations:

Username: <b>avon-physics-1</b>	Username: <b>avon-physics-2</b>	Username: <b>avon-physics-3</b>
Password: <b>ScienceRulez1</b>	Password: <b>ScienceRulez1</b>	Password: <b>ScienceRulez1</b>
