

Ex #1 You are driving in a car traveling at 18 m/s. You accelerate at a constant rate of 1.3 m/s^2 until you get up to a speed of 24 m/s. What distance do you cover when you do this?

Ex #1 You are driving in a car traveling at 18 m/s. You accelerate at a constant rate of 1.3 m/s^2 until you get up to a speed of 24 m/s. What distance do you cover when you do this?

Ex #2 A train is travelling at 73 m/s. The engineer applies the brakes, which cause the train to decelerate at a rate of 1.8 m/s^2 .

- a.) How much time will it take the train to stop?
- b.) What distance will it take the train to stop?

Ex #2 A train is travelling at 73 m/s. The engineer applies the brakes, which cause the train to decelerate at a rate of 1.8 m/s^2 .
