
Task #1

The radio station WZPL broadcasts at a frequency of 99.5 MHz. Radio waves travel at a speed of 3.00×10^8 m/s. (*Hint:* 1 MHz = 10^6 Hz)

- (a) How long is the wavelength of WZPL's radio waves?
- (b) What is the period of these waves?

Task #2

A certain string has a length of 3.2 meters. Its fourth harmonic occurs at 112 Hz.

- (a) What is the wavelength?
 - (b) How far apart are the nodes?
 - (c) What is the fundamental frequency of the string?
 - (d) What is the wave speed through the string?
-
