Sara, an amazingly well-rounded athlete, participates in a grueling race.

1. Sara begins the race by running 5 km from the starting line to checkpoint A in 20 minutues and 40 seconds. What is her average velocity (in m/s)?
2. Next, Sara swims 500 m from checkpoint A to checkpoint B with a velocity of 1.1 m/s. How much time does it take her?
3. From checkpoint B she rides a bike with a velocity of 4.9 m/s for 1 hour. What is the distance between checkpoint B to checkpoint C?
4. Sara must now get all the way back to the starting line to finish the race. Completely exhausted, Sara climbs into her Jeep and drives back to the starting line. What is her velocity to go from checkpoint C to the starting line if the Jeep ride is 19 minutes and 17 seconds?
5. Calculate Sara's **average speed** and **average velocity** for the entire race.
