

Course Information Guide

Physics I

Zachary J. Rohrbach

(317) 544-5000 x5472

ZJRohrbach@avon-schools.org

Course Description

Physics is the study of how the universe works on the most fundamental level. In this class, you will use your powers of observation and logical as well as mathematical reasoning to describe, explain, and predict the behavior of objects.

Course Goals As a result of taking Physics I, you will:

1. Know and understand the process that is used to make the scientific discoveries that are reported in the media or in the workplace
2. Understand the scientific principles that underlie motion, forces, waves, and electricity.
3. Apply your mathematical skills to solving real-world problems
4. Develop problem solving and scientific literacy skills

Required Materials

You are expected to bring the following materials with you to class every day.

Notebook
(will be provided)

Scientific Calculator

Pen or Pencil

Laptop

Computer Charger

Classroom Expectations

Accountable	1.	Be in the classroom by the time the bell rings. <i>You are tardy if you are not in the classroom by the time the bell rings. In compliance with the AHS attendance policy, you will be given a detention on your 3rd and 4th tardies and referred to Saturday School for 5th and 6th tardies.</i>
	2.	Begin class with your notebook/binder, calculator, and pen/pencil on your desk.
	3.	Wear your ID around your neck at all times.
Respectful	4.	When the bell rings, silently work on the warmup.
	5.	Computers should be put away unless explicitly required for instructional activities.
Engaged	6.	All Wireless Communication Devices and earbuds must be powered down and inaccessible at all times. <i>In compliance with the AHS Wireless Communication Device (WCD) Policy and Indiana Senate Enrolled Act 78, all phones, earbuds, and other WCD's should be powered off and inaccessible during the school day. Students found with any WCD will be sent to the office and have their device confiscated.</i>
	7.	Try to take care of restroom breaks outside of class.
	8.	Stay engaged and working until the two-minute alarm .
	9.	Persevere through difficult problems.
	10.	Use your brain; not AI!

Grading

Your pre-exam grade will be 40% Formative (classwork, quizzes, some labs) and 60% Summative (tests, large labs). The weighting of each of these categories is subject to change. Your overall class grade will consist of the pre-exam grade (85%) and the final exam grade (15%).

Tests may be corrected for half credit back on missed questions. Test corrections are due by midterm. In other words, test corrections for units completed before the midterm will not be accepted after the midterm. Directions on how to do corrections will be given later.

Other Class Policies

Artificial Intelligence You are being evaluated on how well *you* can meet the course objectives, not on how well AI can do so. Here are some guidelines:

1. Using AI to help you prepare for a test by giving practice questions or explaining topics is permitted.
2. AI use is **entirely forbidden** on assignments that will be turned in. These assignments are designed to showcase your thinking and not a computer's thinking. AI use in these situations will be considered Academic Dishonesty and will result in a zero and a detention.
3. In the *extraordinarily rare* case that Mr. Rohrbach explicitly allows you to use AI in an academically healthy matter, you must cite that you have done so on your work. Failure to do so is Academic Dishonesty.
4. Mr. Rohrbach is a better teacher than AI. If you find yourself stuck, he would be happy to help you out during SRT, in class, or after school.

Late Work Deadlines for assignments will be announced in class and posted on Schoology. Late work is subject to a 50% penalty. Late work for a particular unit will not be accepted after the test is given for that unit.

Absences and Makeup Work If you are absent, it is your responsibility to check Schoology for your required makeup work and contact Mr. Rohrbach with any questions. Required makeup work is due in a timely manner. Mr. Rohrbach will often also post additional video explanations and recordings on Schoology for students who are absent. You should plan to watch these recordings and take notes over them before you return to school.

There are some “nonessential assignments” that we do in class which will not need to be made up. Students with *excused* absences will be exempted from these assignments in the grade book. Students with *unexcused* or *unverified* absences will receive a zero, which cannot be made up. This is in line with the policy in the policy in the AHS Student/Parent Handbook.

Contacting Mr. Rohrbach Parents and students should feel free to contact Mr Rohrbach at any time via email (ZJRohrbach@avon-schools.org), phone, ParentSquare, or Schoology.
