

Name: _____ Period: _____

Mon, May 4

Warmup

For each of the following questions, use the equation $v = f\lambda$. Be very careful about which of the speeds listed below you are using.

speed of light: 3.0×10^8 m/s	speed of sound in air: 340 m/s
---------------------------------------	--------------------------------

1. The lowest frequency of X-Rays are 3.0×10^{16} Hz. Calculate the wavelength of these waves.

2. Middle “C” on the piano has a frequency of 261.6 Hz. What is the wavelength of this wave?
