

Name:

Period:

Wed, Jan 14 (Pd 6) / Thu, Jan 15 (Pd 1, 4)

Warmup

Draw a picture for the following problem and solve it using conservation of momentum concepts. Feel free to look at your notes from last class to help you.

A 110-kg tackler moving at 2.5 m/s meets head-on an 82-kg halfback moving 5.0 m/s in the opposite direction. The tackler holds onto the halfback (so they are “stuck together”). What is their speed immediately after the collision?
