

Name: _____

Period: _____

Mon, Feb 2

Warmup

The man on the right side of the lever pushes the lever straight down 3.0 m. He exerts a force of 1500 N.

- (a) Calculate the work done by the man.

- (b) The left side of the lever raises 0.5 m. If the work done by the man is transferred to the left side, calculate the force on this side of the lever.

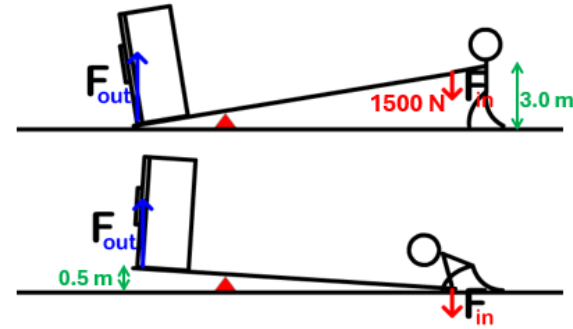

- (c) What mass of refrigerator could the man lift with this lever?
