
Task #1

Find the period of a spring with constant 5.0 N/m when 3.5 kg of mass are hung from it.

Task #2

A certain spring stretches **5.2 cm** when **130 g** are hung from it. What is the spring constant?

Task #3

What is the length of a pendulum that has a period of precisely 1.00 second .

Task #4

What mass must you attach to a spring of constant 300 N/m in order for it to make 20 oscillations in 5 seconds?
