

Name: _____

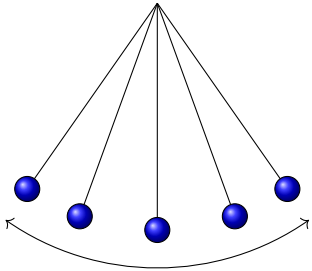

Period: _____

Tue, Feb 24 (Pd 1, 6) / Wed, Feb 25 (Pd 4)

Warmup

1. Today, we are starting a new unit is called *Simple Harmonic Motion*. Think about the word **harmonic**. What does it make you think of?

2. One example of Simple Harmonic Motion is a *pendulum*, which is a mass on the end of a string that swings back and forth. What do you know about pendulums or where have you seen them before?

3. Think about Kinetic Energy and Potential Energy. When would the pendulum have the most KE? When would it have the most PE?
