

Name: \_\_\_\_\_

Period: \_\_\_\_\_

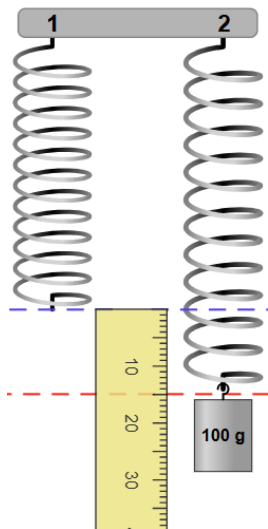

**Fri, Apr 17**

### Warmup

1. Consider the wave below:

- (a) What type of wave is it?
  - (b) What is the wavelength?
  - (c) If the frequency is 400 Hz, what is the wave speed?
2. The picture below shows a spring that has 100 grams (that is, 0.100 kg) hanging from it. It has stretched 15 cm (that is, 0.15 m). Calculate the spring constant
