Assignment for Fri, Mar 6

Review Problems

$$T_P = 2\pi\sqrt{\frac{\ell}{g}}$$

1. Find the period of a pendulum that is 1.5 meters long.
2. Find the length of a pendulum that has a period of 4.0 seconds.

Your Project

3. Spend your class time working on your project. You can use your computer, but **your phones need to be put away at all times**. At the end of the period, explain what you used your time for below:
4. What do you have left to do on your project, which is due just over a week from today on March 16?
5. If you had to give yourself a grade (A,B,C,D,F) based on how wisely you used your time in class today, what would it be? Why?
