

Newton's First Law

An object _____ in its state of rest or uniform speed in a straight line unless acted on by a _____.

Newton's Second Law

Acceleration is

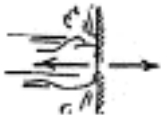

- _____ to net force,
- in the _____ as net force, and
- _____ to mass.

Two Equations:

Newton's Third Law

If a first object puts a force on a second object, then the second object puts an _____ and _____ force on the first object.

“Every _____ has an _____ and _____ reaction force.”

Action:
fist hits wall

Reaction:

Action:
bat hits ball

Reaction:

Action:
rotors push air ↓

Reaction:
