

Name:

Period:

Fri, Jul 31

Warmup

Today, we will start to talk about the metric system. From other classes, you already know something about the metric system. Answer these questions based on what you already know.

1. What is the difference between a meter, a centimeter, a millimeter, and a kilometer?

2. Why do we need prefixes like centi-, milli-, and kilo-? Why can't we just measure everything in meters?
