

Name: _____ Period: _____

Mon, Aug 10

Warmup

Speed

Read page 41 in the *Conceptual Physics* textbook and answer these questions.

1. What is the difference between instantaneous speed and average speed?
2. What is the average speed of a car that travels 40 km in one-half hour (0.5 hr)?
3. Would the maximum speed of the car in #2 be larger than, smaller than, or equal to 80 km/h?

stop here until given further instructions.

Velocity

4. What is the difference between speed and velocity?
5. The speedometer of a car moving east reads 100 km/h and the speedometer of a car moving west also reads 100 km/h. Do they have the same speed? Do they have the same velocity?
6. During a certain period of time, the speedometer of a car reads a constant 60 km/h. Does this indicate a constant speed? Does it indicate a constant velocity?
