

Name: _____ Period: _____

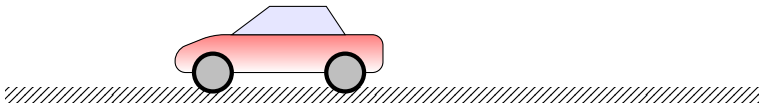

Fri, Aug 14

Warmup

1. What is the difference between a *scalar* and a *vector*?
2. Indicate with a checkmark whether each of these is a scalar or a vector:

	scalar	vector
distance		
displacement		
speed		
velocity		
time		

3. A sprinter runs around a 400-meter track once in 40 seconds.
 - (a) What is her average speed?
 - (b) What is her average velocity?
4. A car is driving toward the left and does so while increasing speed.

- (a) Is velocity positive or negative? Explain
- (b) Is acceleration positive or negative? Explain.
