Warmup

The Kinematic Equations

$$v_f = v_i + at \quad d = v_i t + \frac{1}{2}at^2 \quad v_f^2 = v_i^2 + 2ad$$

"Old Faithful" "The Big Chalupa" "Ain't Got no Time"

1. A baseball pitcher throws a baseball with a speed of 43 m/s. Estimate the acceleration of the ball during the throwing motion. The ball starts at rest. In throwing the baseball, the pitcher accelerates it through a displacement of about 3.5 m.

This problem is based on Ch 2, Problems 25 in Giancoli's *Physics*, 7th ed.
