

Projectile Motion Equations

$v_f = v_i + at$ “Old Faithful”	$d = v_i t + \frac{1}{2}at^2$ “The Big Chalupa”	$v_f^2 = v_i^2 + 2ad$ “Ain’t Got No Time”
------------------------------------	--	--

A vector diagram showing a velocity vector v_R at an angle θ to the horizontal. The horizontal component is v_x and the vertical component is v_y . Dashed lines indicate the right triangle formed by the components.

$$\theta = \tan^{-1}(v_y/v_x)$$
$$v_x^2 + v_y^2 = v_R^2$$
$$v_x = v_R \cos(\theta)$$
$$v_y = v_R \sin(\theta)$$
