

Mon, Sept 21

### Warmup

Go to Schoology and click the link to “**Projectile Motion PhET Simulation**”. When the page loads, click the play button.

- Go to the “Intro” tab.
- Drag the cannon to the ground (altitude of 0 m) and make sure to check the two boxes under Velocity Vectors.

1. Which angle goes the highest in the air?
2. Which angle goes the farthest forward?
3. Find 4 pairs of angles that go the same range
