

Name: _____

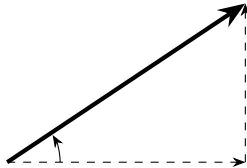

Period: _____

Tue, Sept 22

Warmup

1. What two things must a *vector* have?

2. In the following diagram, label the *resultant* and the *x-component*, and the *y-component*.

3. What happens to the *x*-component and *y*-component of a projectile's velocity over time?

4. For a given initial projectile speed, which angle gives the furthest range? Why is that?
