

Name: _____ Period: _____

Wed, Sept 30 (Pd 6) / Thu, Oct 1 (Pd 1, 3)

Warmup

Given a projectile with an initial x -velocity of 16.1 m/s and an initial y -velocity of 42.4 m/s, calculate the **resultant initial velocity** and the **launch angle** of the projectile. Then fill in all of the blanks in the diagram below.
